Health Research Policy
and Systems

OPINION

Open Access

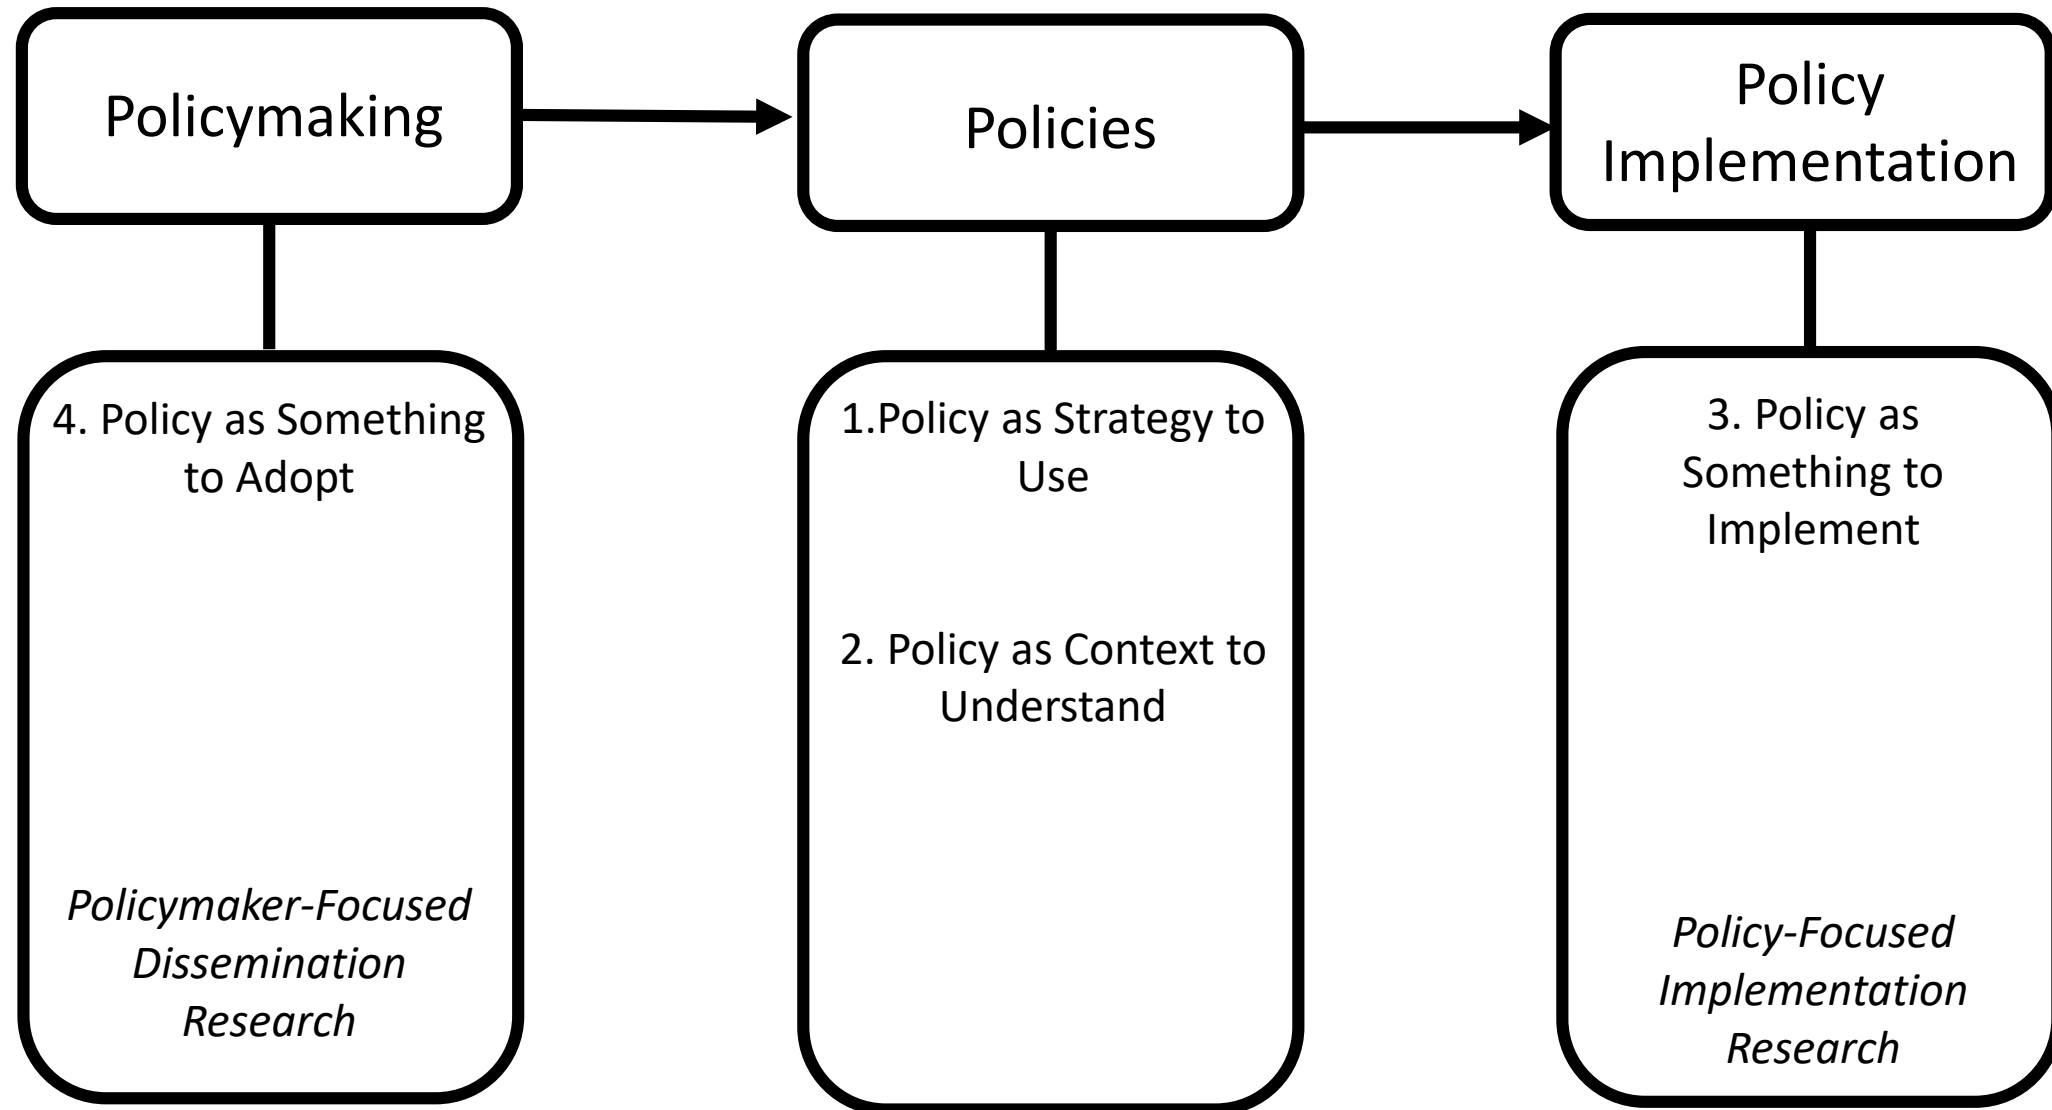

Evidence-based policymaking is not like evidence-based medicine, so how far should you go to bridge the divide between evidence and policy?

Paul Cairney^{1,2*}  and Kathryn Oliver^{3,4}

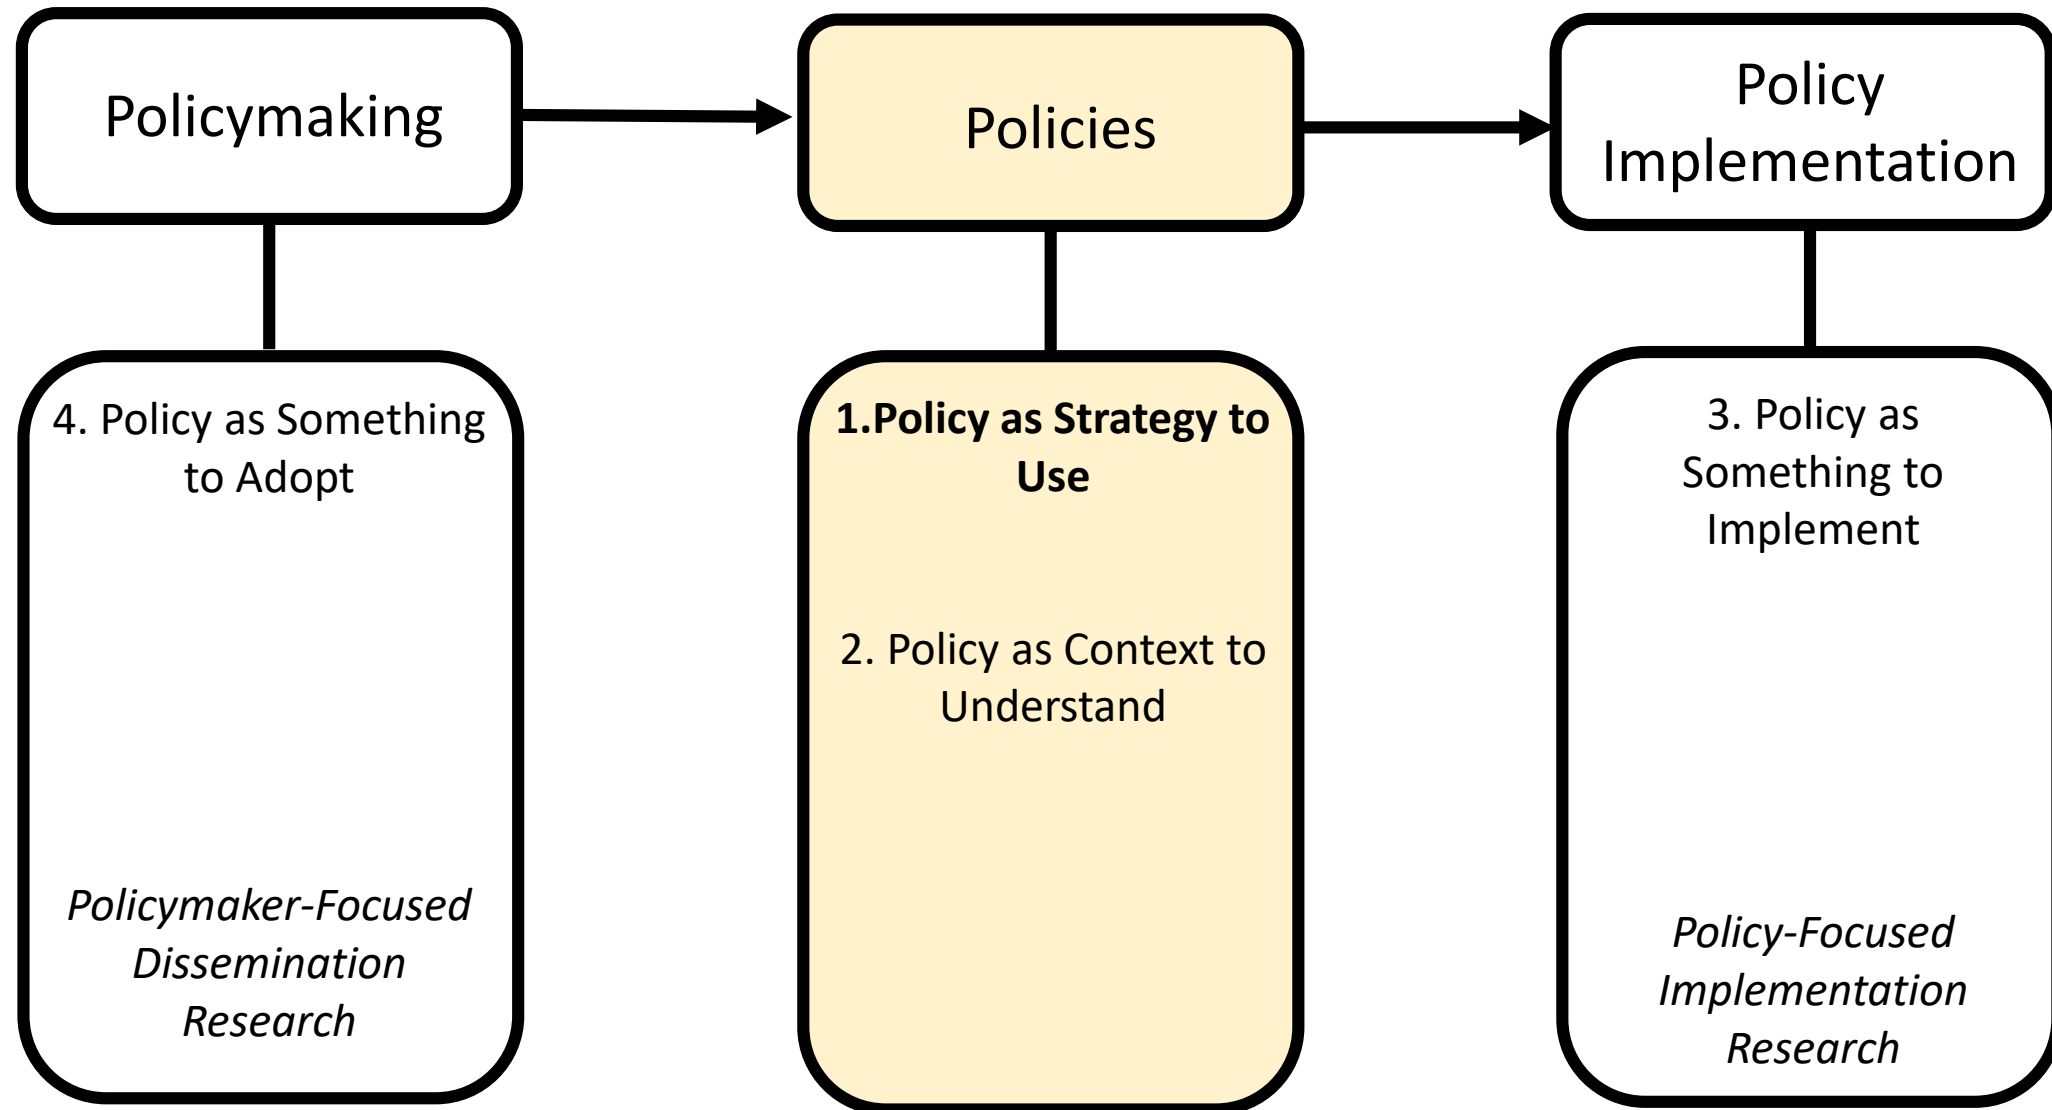

Orienting Definitions for Policy-Focused Implementation Science

- **Policy Dissemination Research:**
 - Seeks to understand how research evidence can be most effectively communicated to policymakers and integrated into policymaking processes
 - Enact policies that are aligned with high quality evidence and promote health equity
 - Improve use of research evidence in policymaking
- **Policy Implementation Research:**
 - Seeks to understanding how the roll out of polices can be optimized to maximize health benefits and health equity
 - Improve use of research evidence in policy implementation

4 Ways to Think About Policy in Implementation Science

4 Ways to Think About Policy in Implementation Science

1. Policy as Strategy to Use

- Goal:
 - Use policy as a strategy to **directly** address barriers and activate facilitators to implementation of an intervention (“the thing”)
- Caveats: Using policy as strategy often...
 - Requires political will/commitment from policymakers, may not be feasible
 - May be technically challenging, slow to change
 - But also can happen quickly, within a political moment

Implementation Strategies That Are Especially Policy Relevant to Policy

- Access new funding
- Alter patient/consumer fees
- Change accreditation or membership requirements
- Change liability laws
- Fund and contract for the clinical innovation
- Make billing easier
- Mandate change

Powell et al. *Implementation Science* (2015) 10:21
DOI 10.1186/s13012-015-0209-1

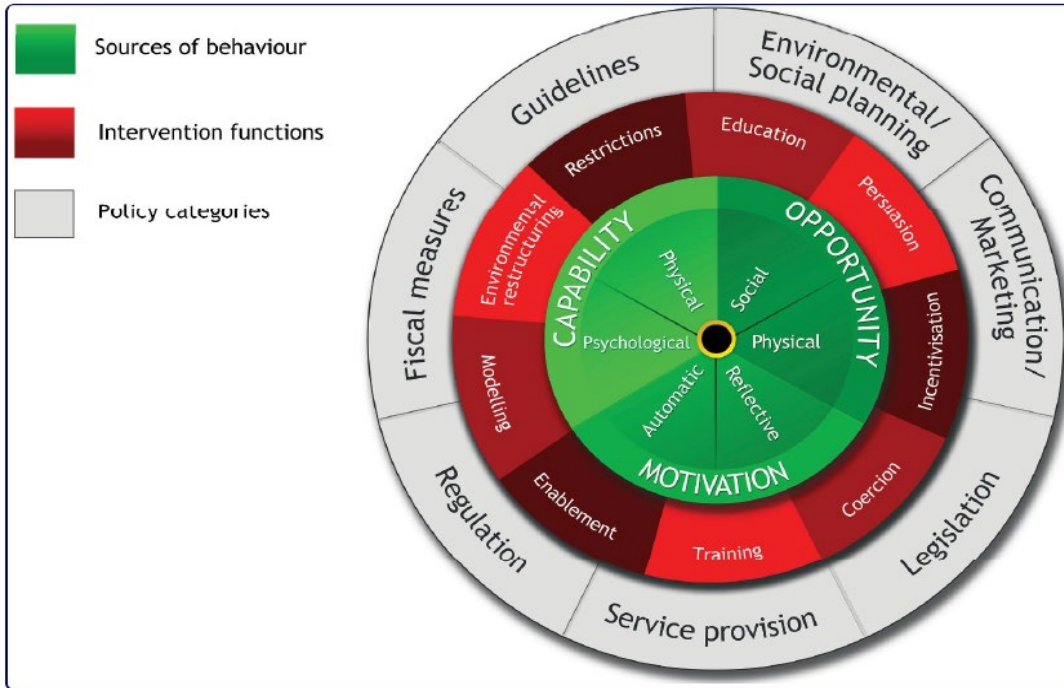

RESEARCH

The behaviour change wheel: A new method for characterising and designing behaviour change interventions

Michie et al.

Policy as Strategy to Use: Example

Dopp et al. *Implementation Science* (2023) 18:50
<https://doi.org/10.1186/s13012-023-01305-z>

Implementation Science

RESEARCH

Open Access

Comparing organization-focused and state-focused financing strategies on provider-level reach of a youth substance use treatment model: a mixed-method study

Alex R. Dopp^{1*} , Sarah B. Hunter¹, Mark D. Godley², Isabelle González¹, Michelle Bongard¹, Bing Han³, Jonathan Cantor¹, Grace Hindmarch¹, Kerry Lindquist¹, Blanche Wright^{1,4}, Danielle Schlang¹, Lora L. Passetti², Kelli L. Wright², Beau Kilmer¹, Gregory A. Aarons⁵ and Jonathan Purtle⁶

Policy as Strategy to Use: Example

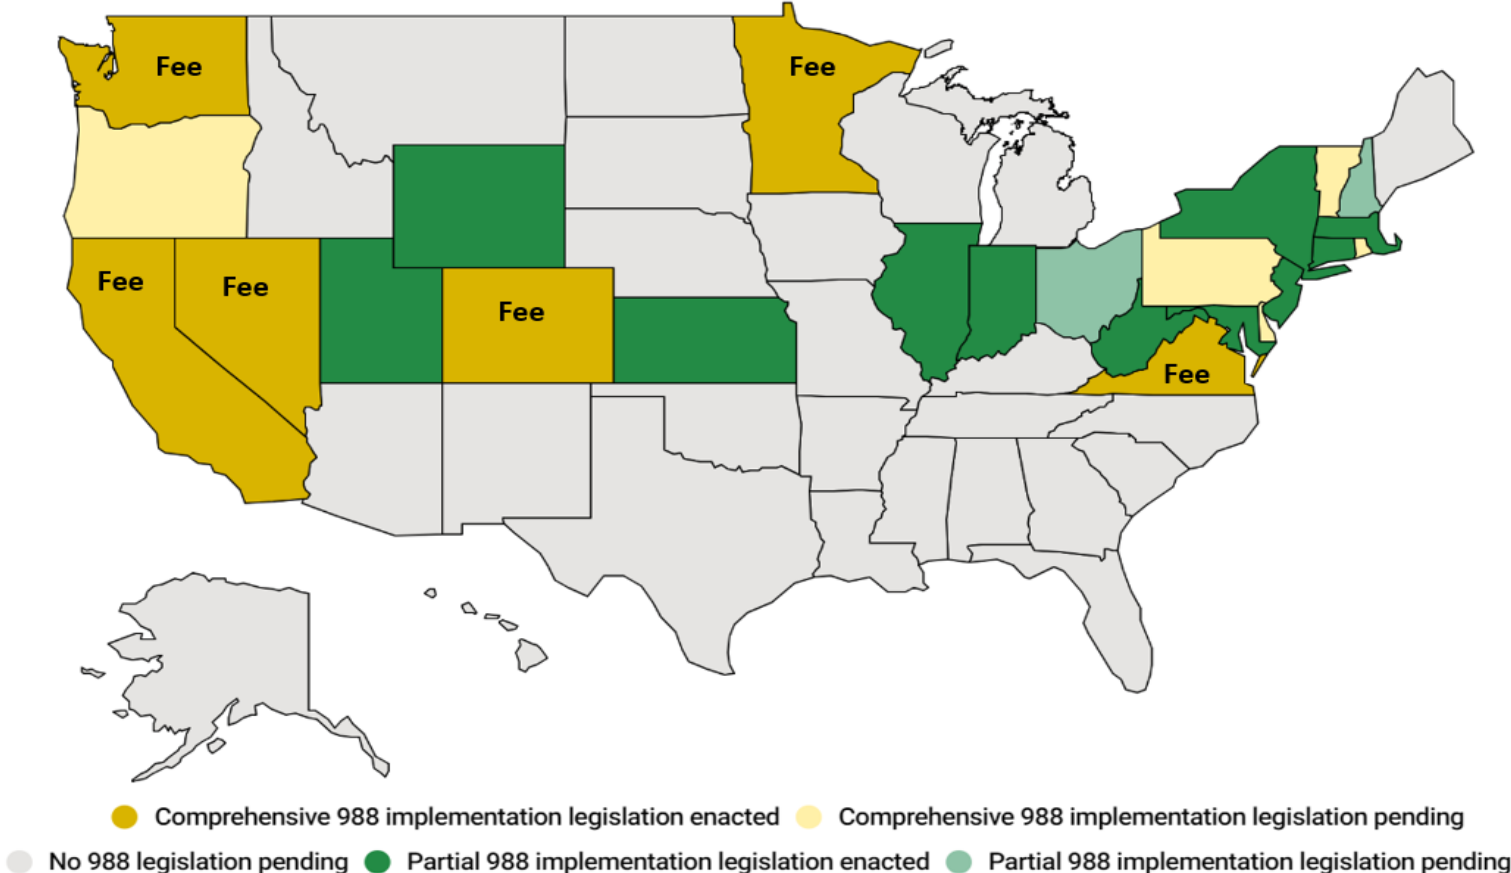

Implementation of the Federal 988 Suicide and Mental Health Crisis Hotline Policy: Determinants and Effects of State Policy Implementation Financing Strategies (NIMH R01MH131649)

- “The thing”= the services people receive via the Lifeline
- Implementation strategy: State financing for Lifeline services, specifically telecom fees

Policy as Strategy to Use: Example

Implementation of the Federal 988 Suicide and Mental Health Crisis Hotline Policy: Determinants and Effects of State Policy Implementation Financing Strategies

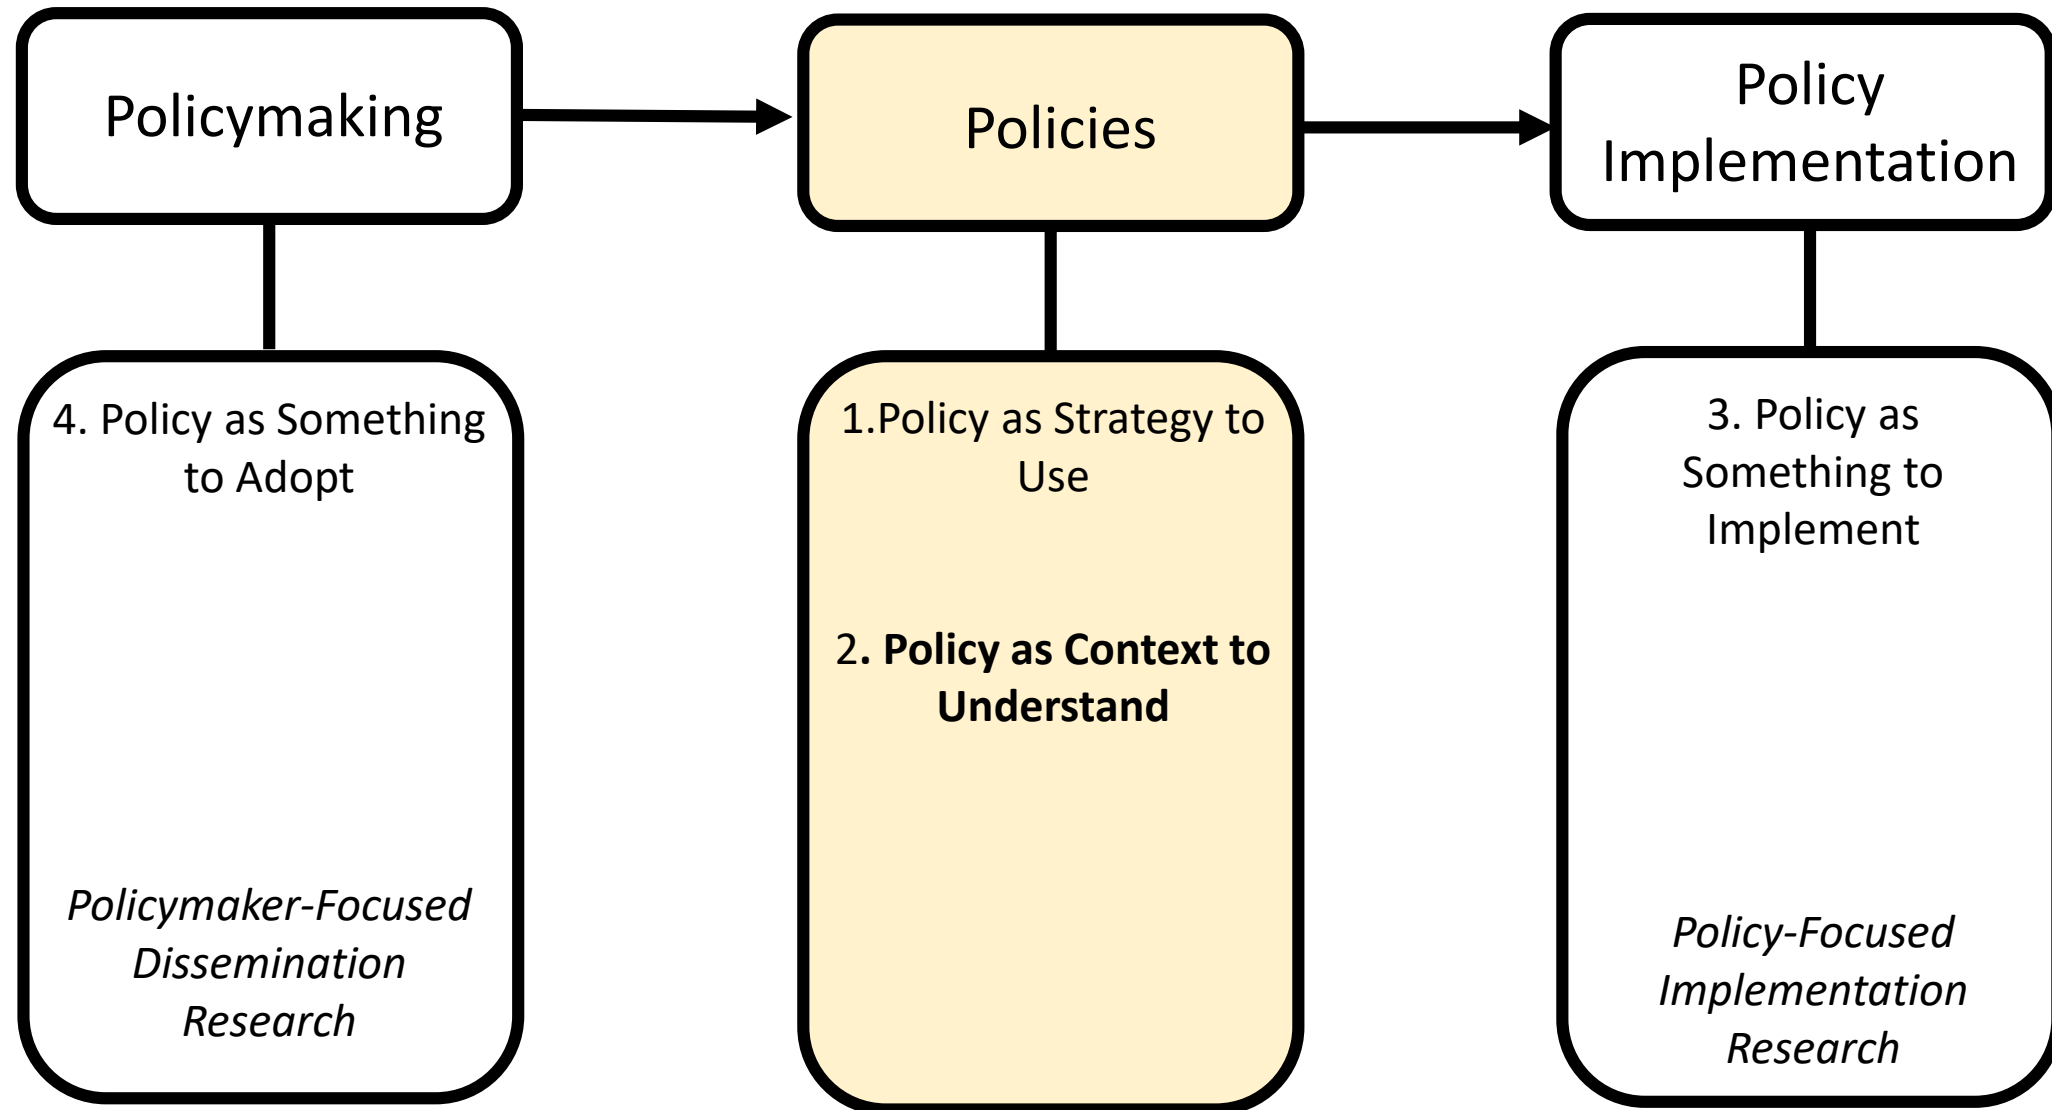

Policy as Strategy to Use: Example

Implementation of the Federal 988 Suicide and Mental Health Crisis Hotline Policy: Determinants and Effects of State Policy Implementation Financing Strategies

- Aim 1: Characterize states' 988 implementation financing strategies and identify determinants of implementation strategy adoption
- Aim 2: Explore perceptions of the financing determinants of 988 policy implementation success and acceptability and feasibility of legislative financing strategies to improve implementation.
- Aim 3: Determine the effects of 988 user fee legislation on policy implementation fidelity and reach and mental health crisis outcomes, and assess effect heterogeneity across demographic groups.

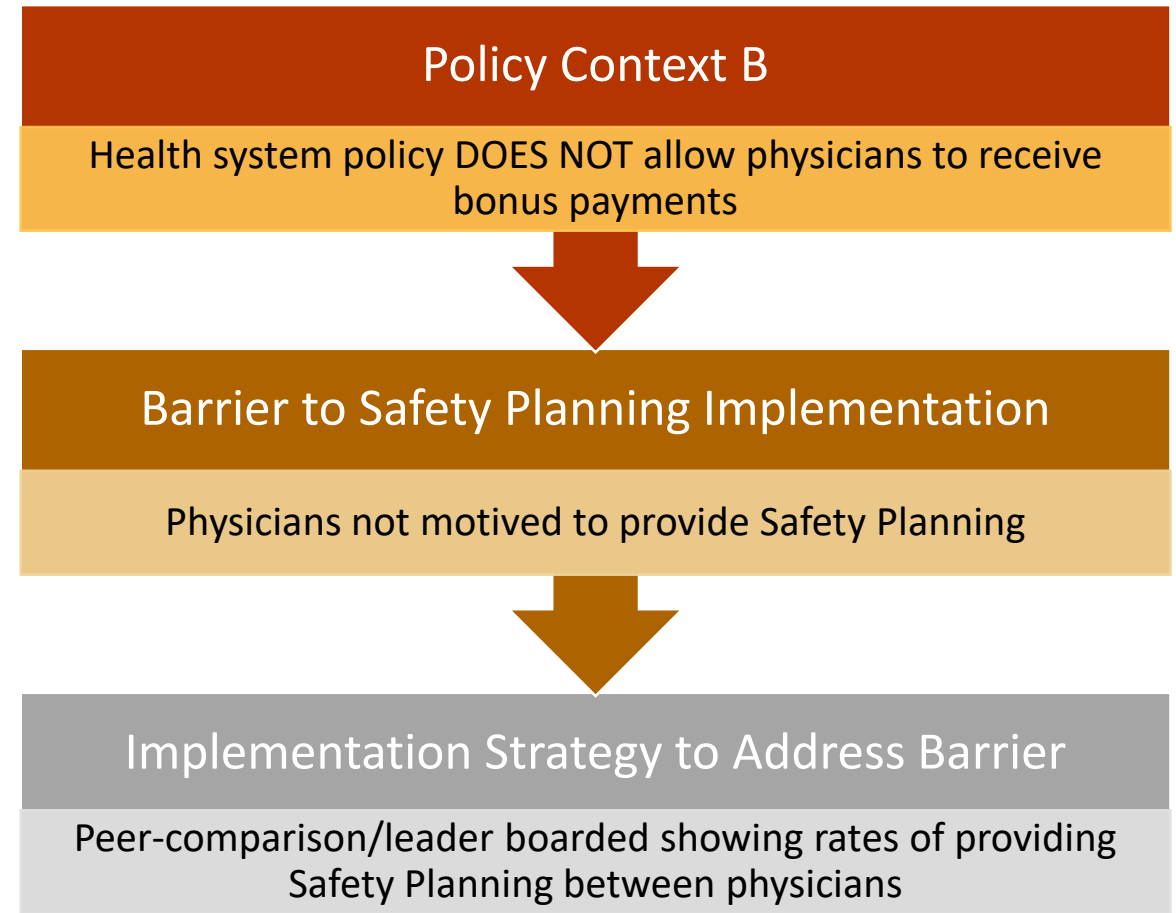

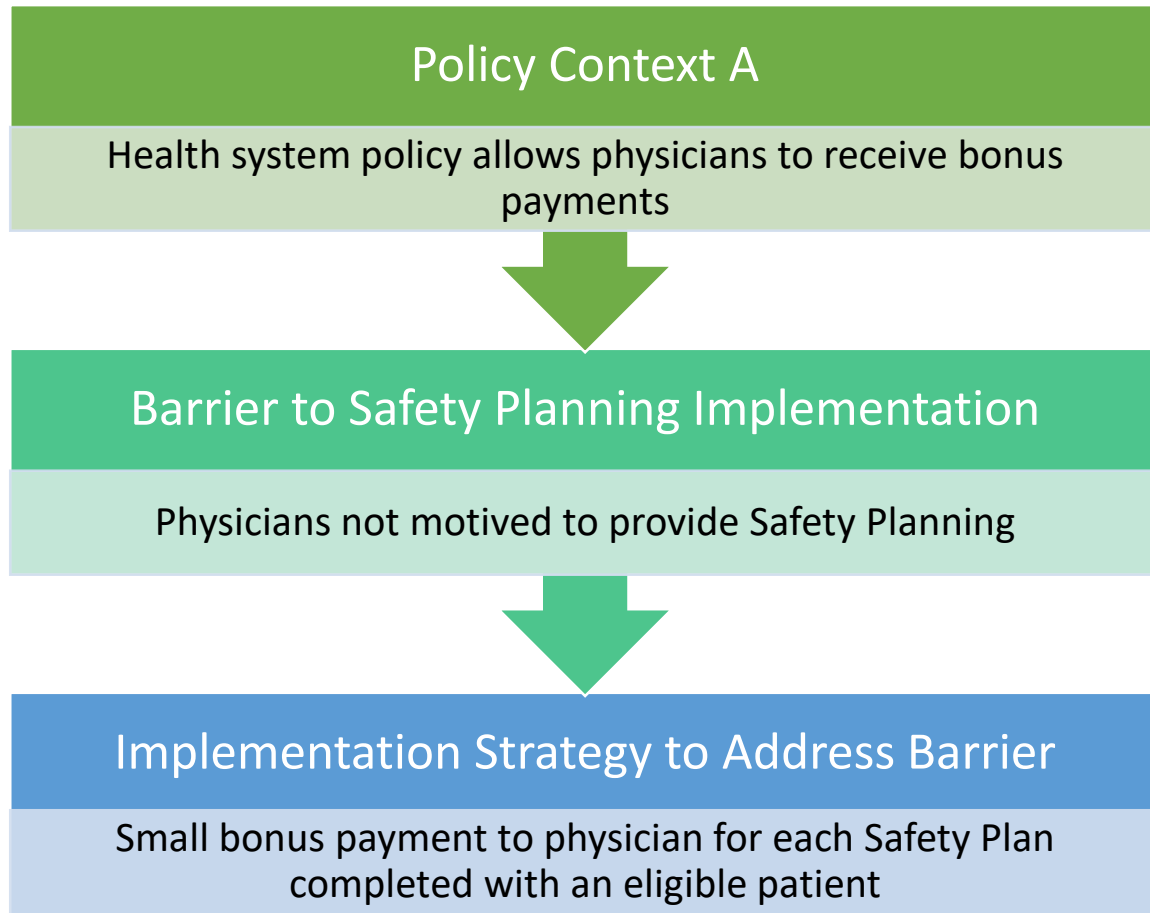

4 Ways to Think About Policy in Implementation Science

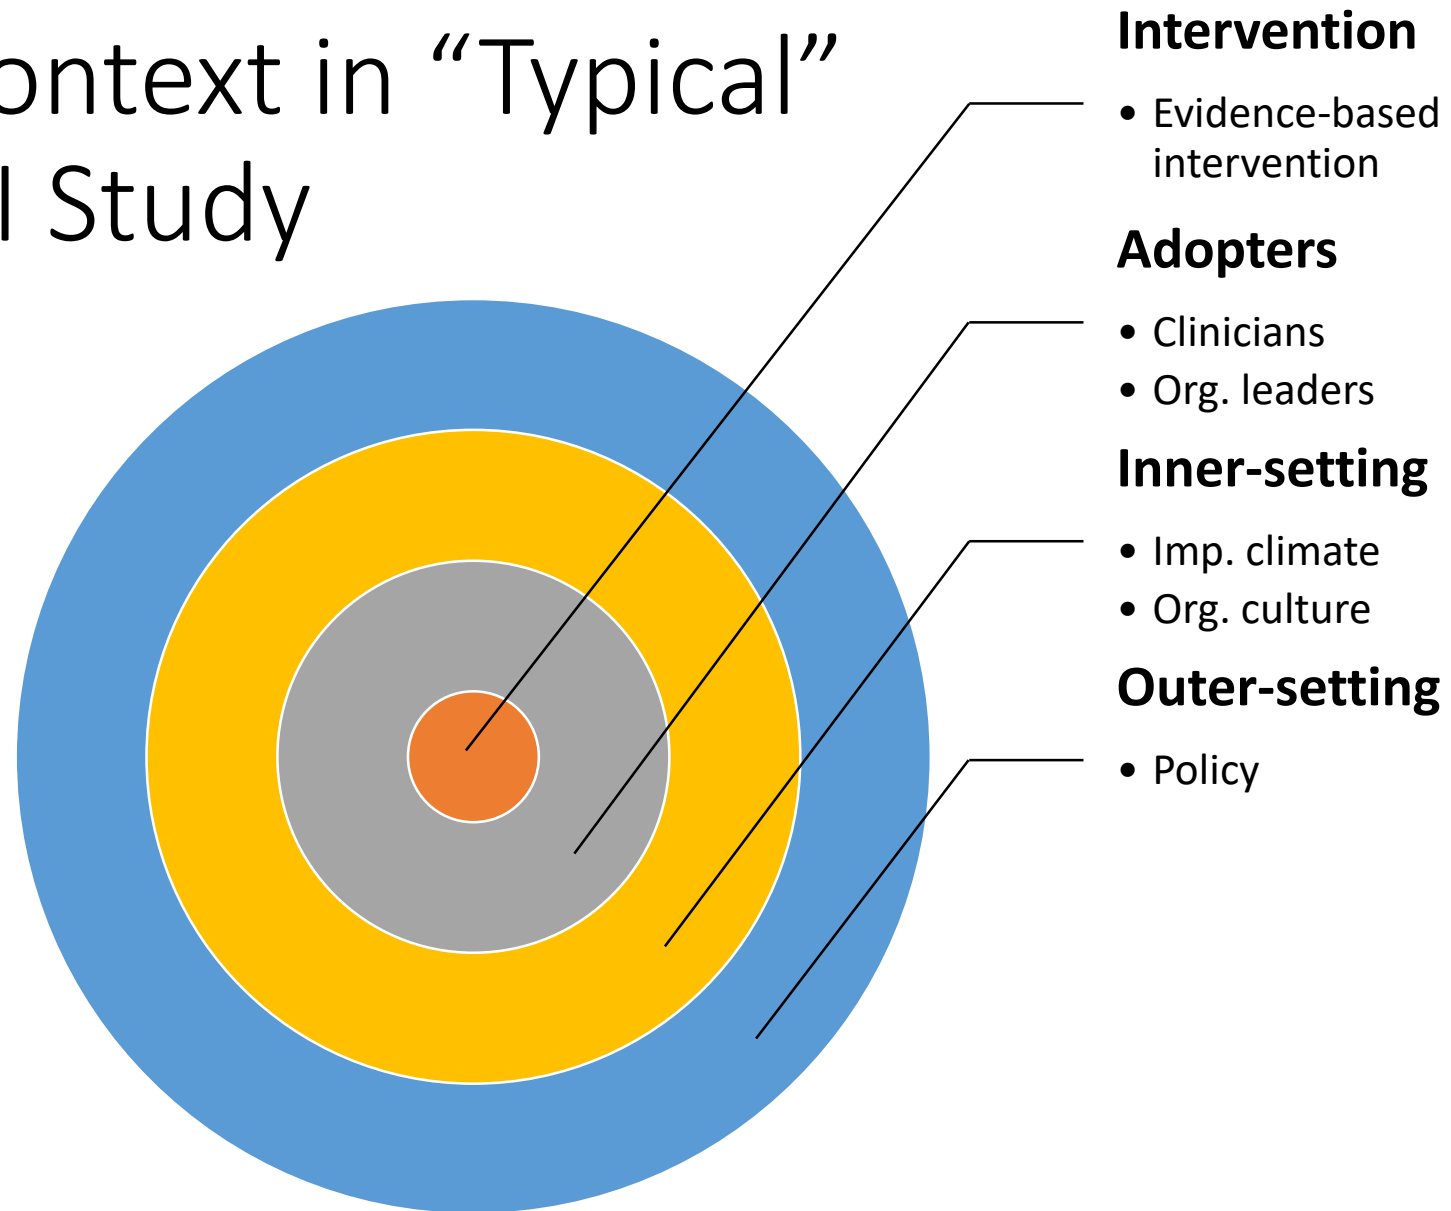

2. Policy as Context to Understand

- Goal:
 - Select and tailor clinically/organizationally-focused implementation strategies for **different policy contexts** (clinical/programmatic intervention is “the thing”)

Policy as Context to Understand: Example Suicide Safety Planning in the ED

Levels of Context in “Typical” Clinical D&I Study

Levels of Context in Policy-Focused D&I Study

Intervention

- Policy, evidence-supported

Adopters

- Legislators
- Admin. policymakers

Inner-setting

- Legislature politics
- Governor agenda

Outer-setting

- What influences policymaking?

Levels of Context in Policy-Focused D&I Study

Intervention

- Policy, evidence-supported

Adopters

- Legislators
- Admin. policymakers

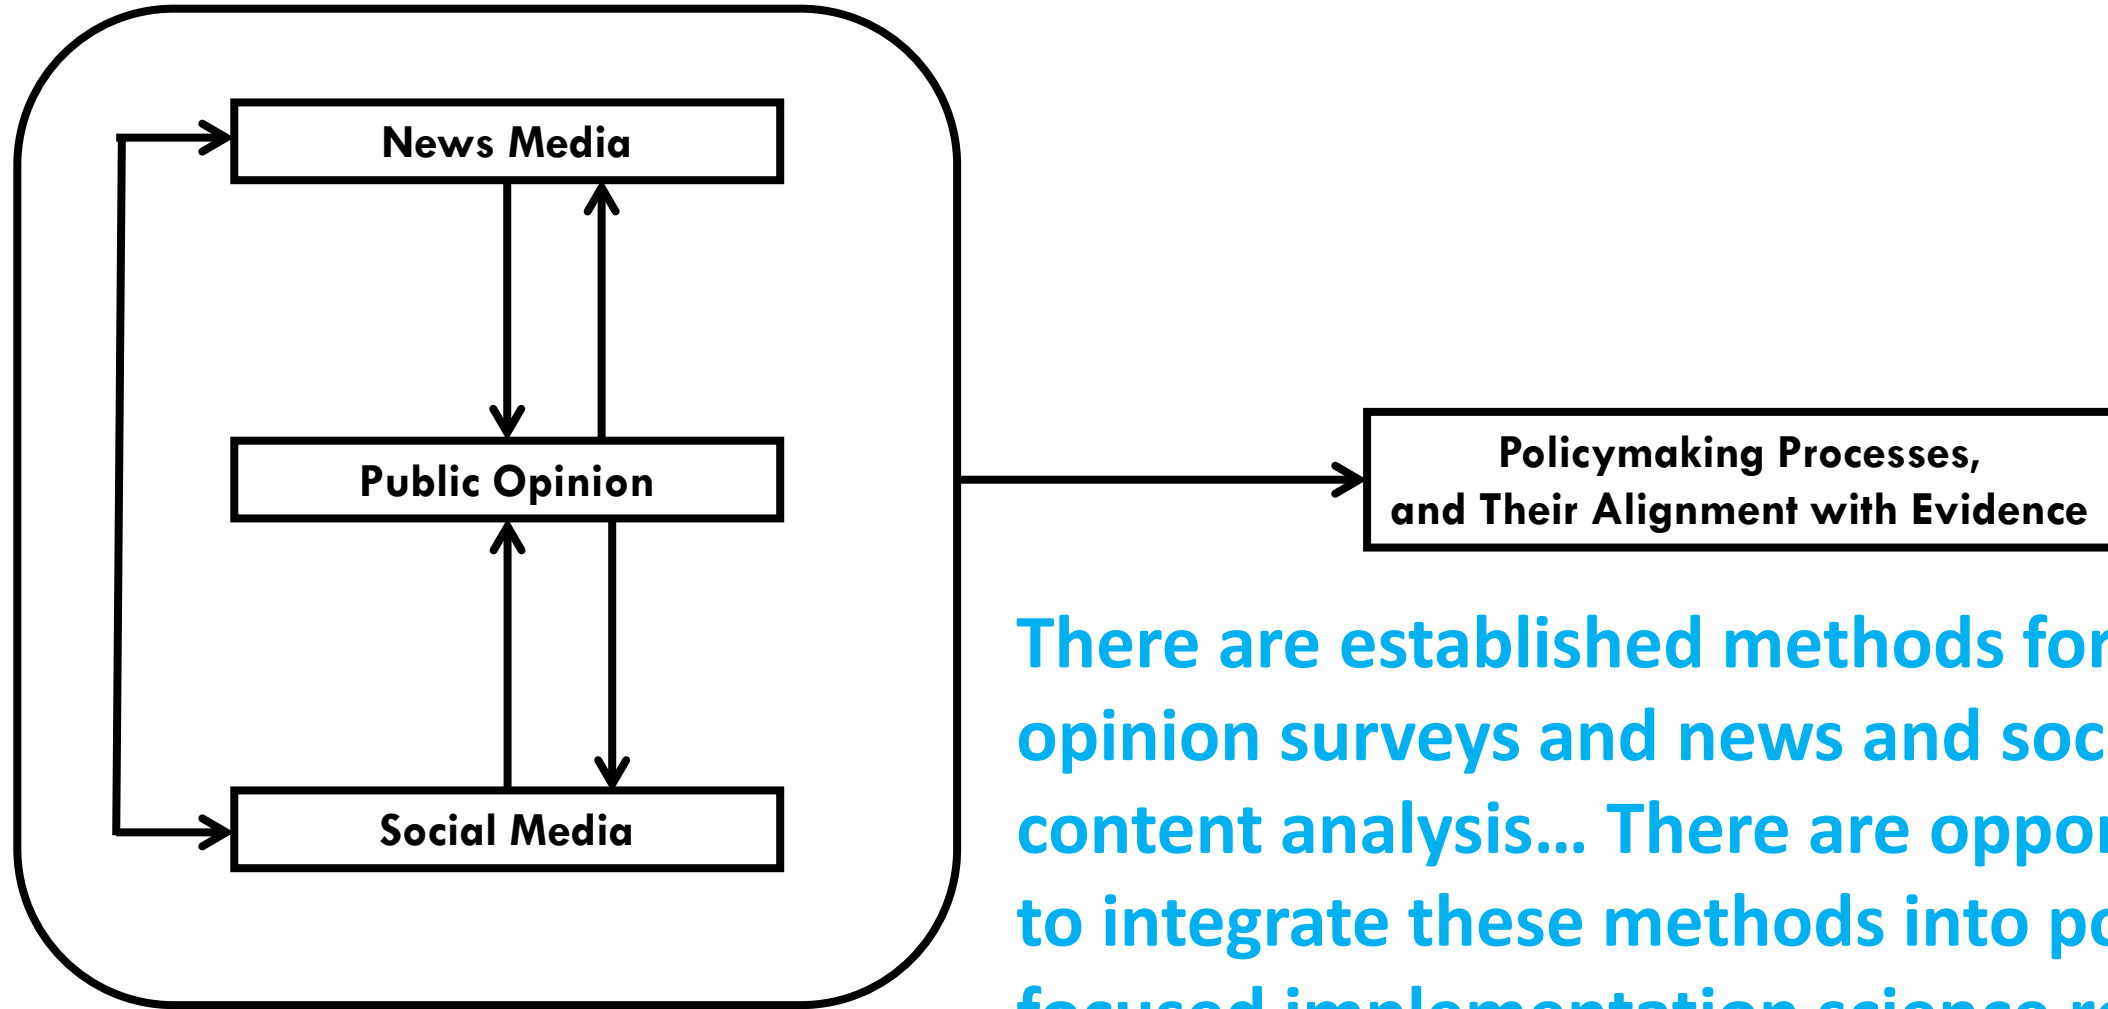

Inner-setting

- Legislature politics
- Governor agenda

Outer-setting

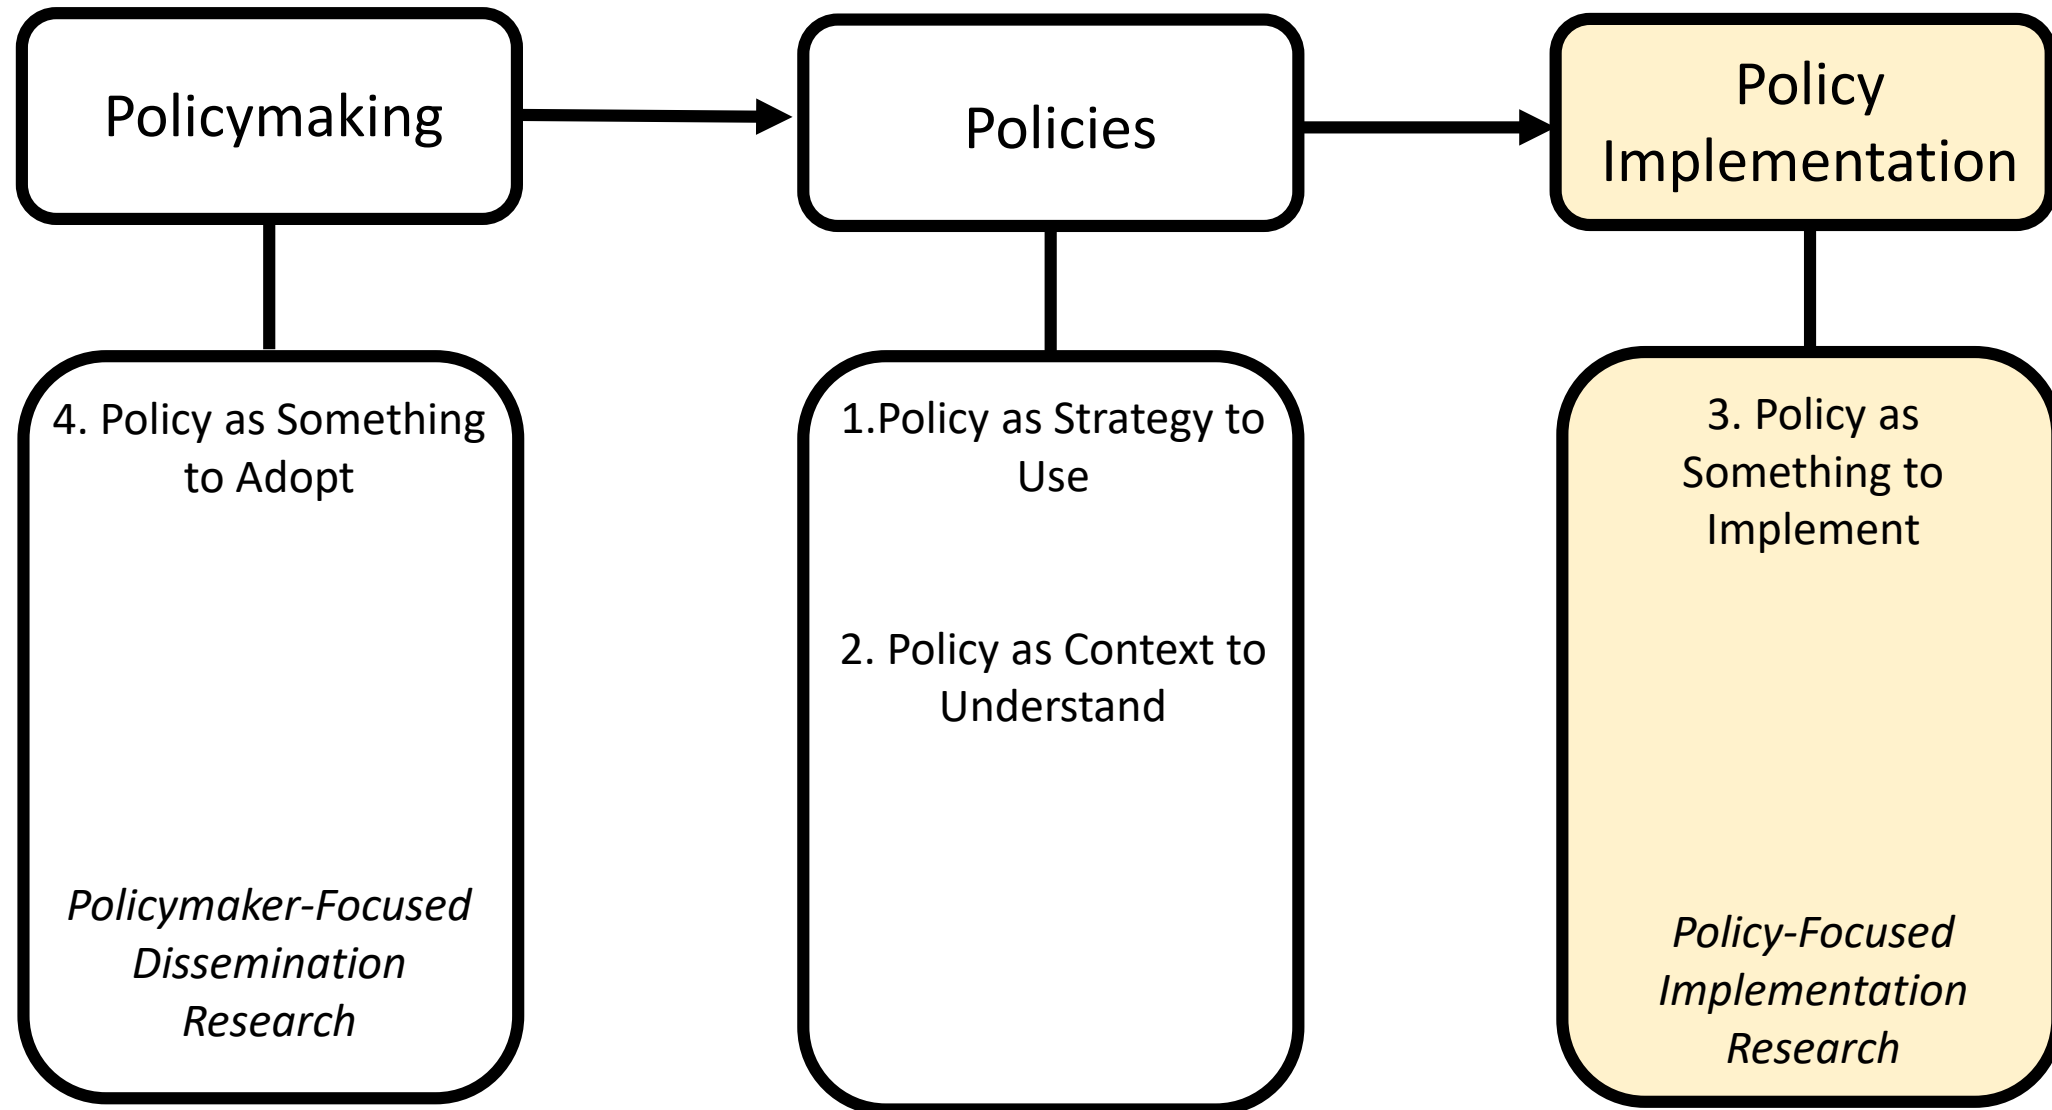

- Public opinion
- Fiscal environments

Influences and Indicators of Public Opinion

There are established methods for public opinion surveys and news and social media content analysis... There are opportunities to integrate these methods into policy-focused implementation science research.

4 Ways to Think About Policy in Implementation Science

3. Policy as Something to Implement

- Goal:
 - Understand how the **process of implementing an evidence-supported policy can be improved**
- Example research aims:
 - Describe the process through which the policy was implemented
 - Assess knowledge about the policy among key groups
 - Assess the extent to which the policy was enforced
 - Identify barriers and facilitators to policy implementation
 - Compare the effects of different approaches to policy implementation (dif-in-dif, or randomized designs)

Policy as Something to Implement: Example

McGinty et al. *Implementation Science* (2021) 16:2
<https://doi.org/10.1186/s13012-020-01071-2>

A policy implementation study of earmarked taxes for mental health services: study protocol

Jonathan Purtle^{1*} , Nicole A. Stadnick², Megan Wynecoop¹, Eric J. Bruns³, Margaret E. Crane^{4,5} and Gregory Aarons²

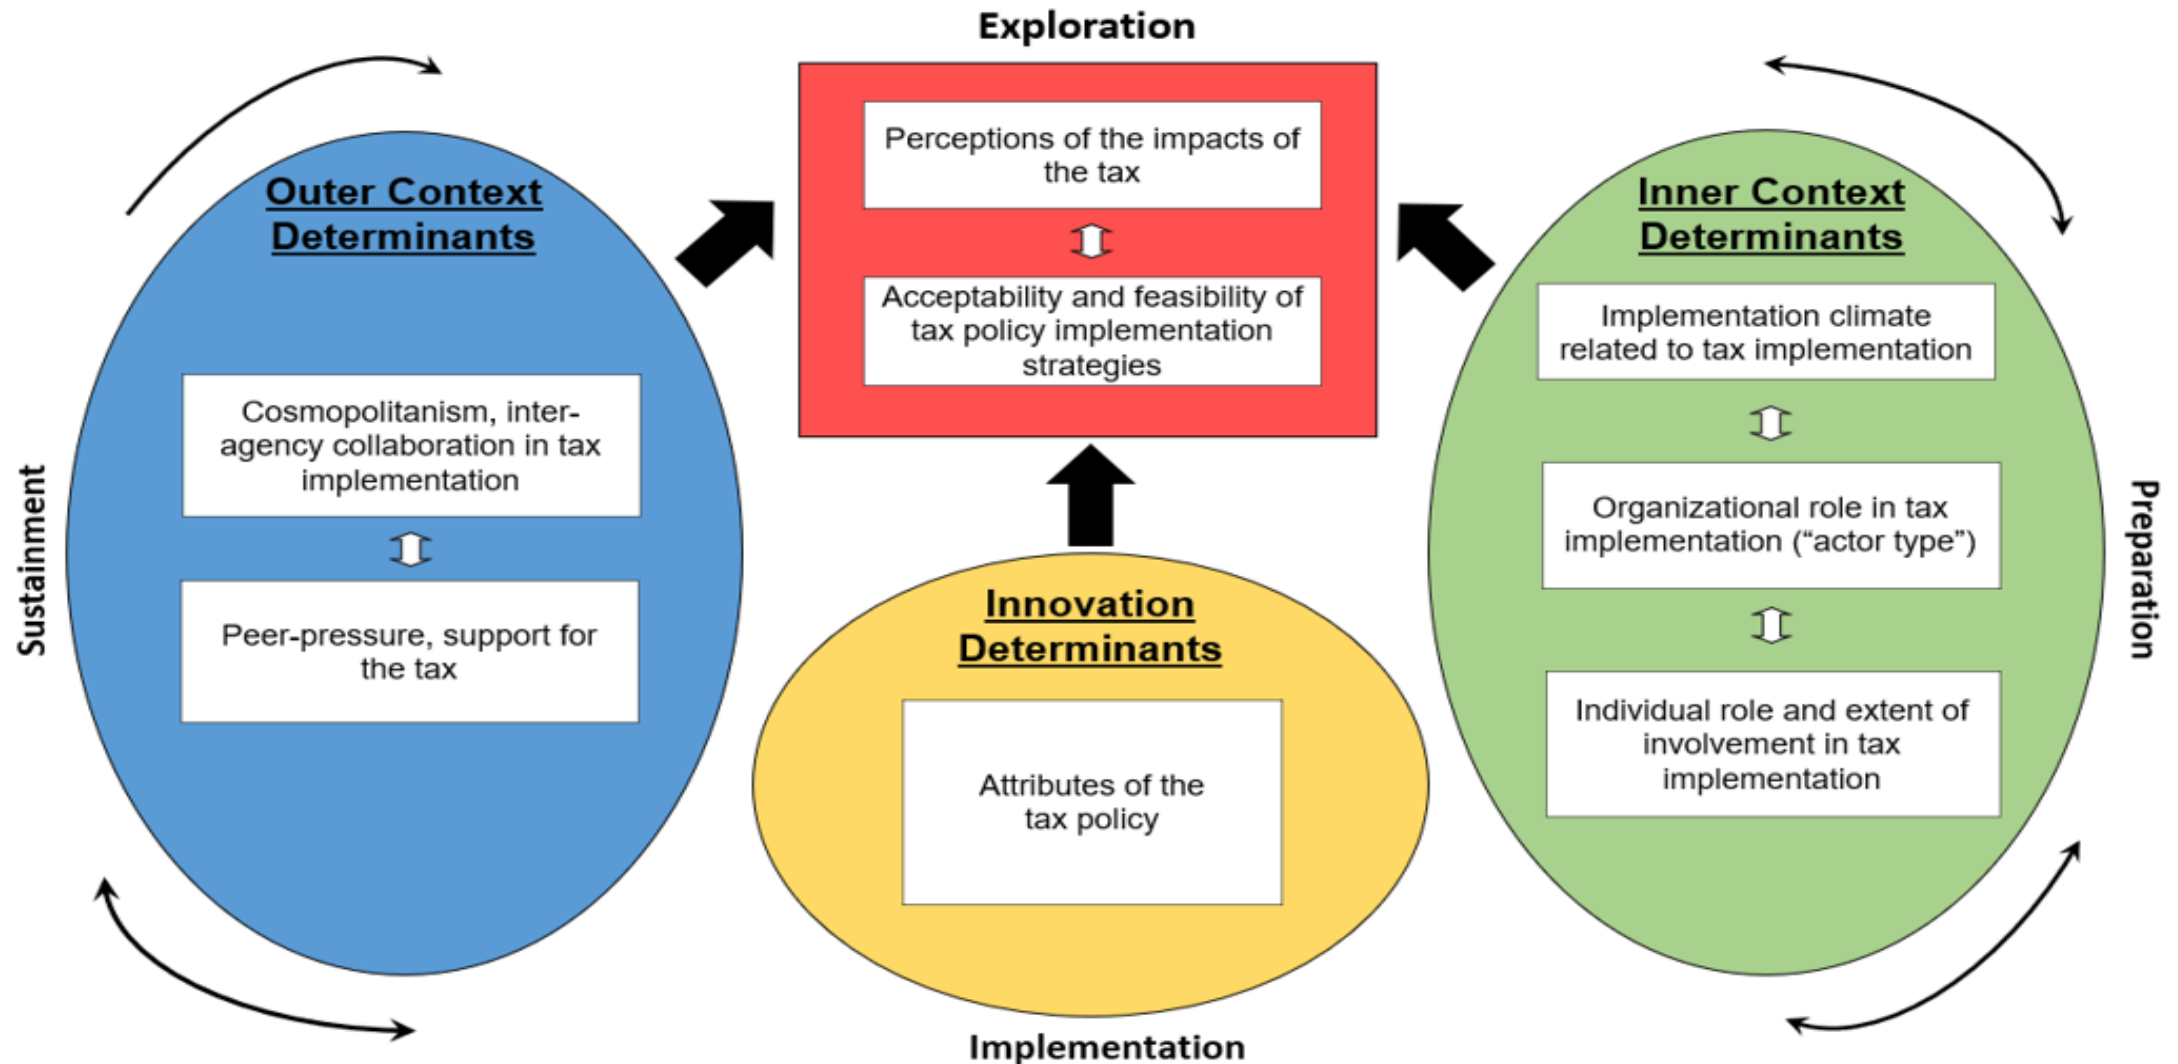

Policy as Something to Implement: Example

Policy Implementation Research on Earmarked Taxes for Mental Health Services (NIMH R21MH125261)

- Aim 1: Identify all jurisdictions in the U.S. that have implemented earmarked taxes for mental health services and catalogue information about tax design.
- Aim 2: Characterize mental health agency leaders' experiences implementing earmarked taxes, understand the determinants of decisions about tax-funded programs using the EPIS framework, and assess the acceptability and feasibility of different types of implementation strategies.
- Aim 3: Develop a conceptual policy implementation framework to improve earmarked tax design, inform the selection of implementation strategies to increase the taxes' reach of EBPs, and disseminate the framework to policy audiences.

Conceptual Framework: EPIS

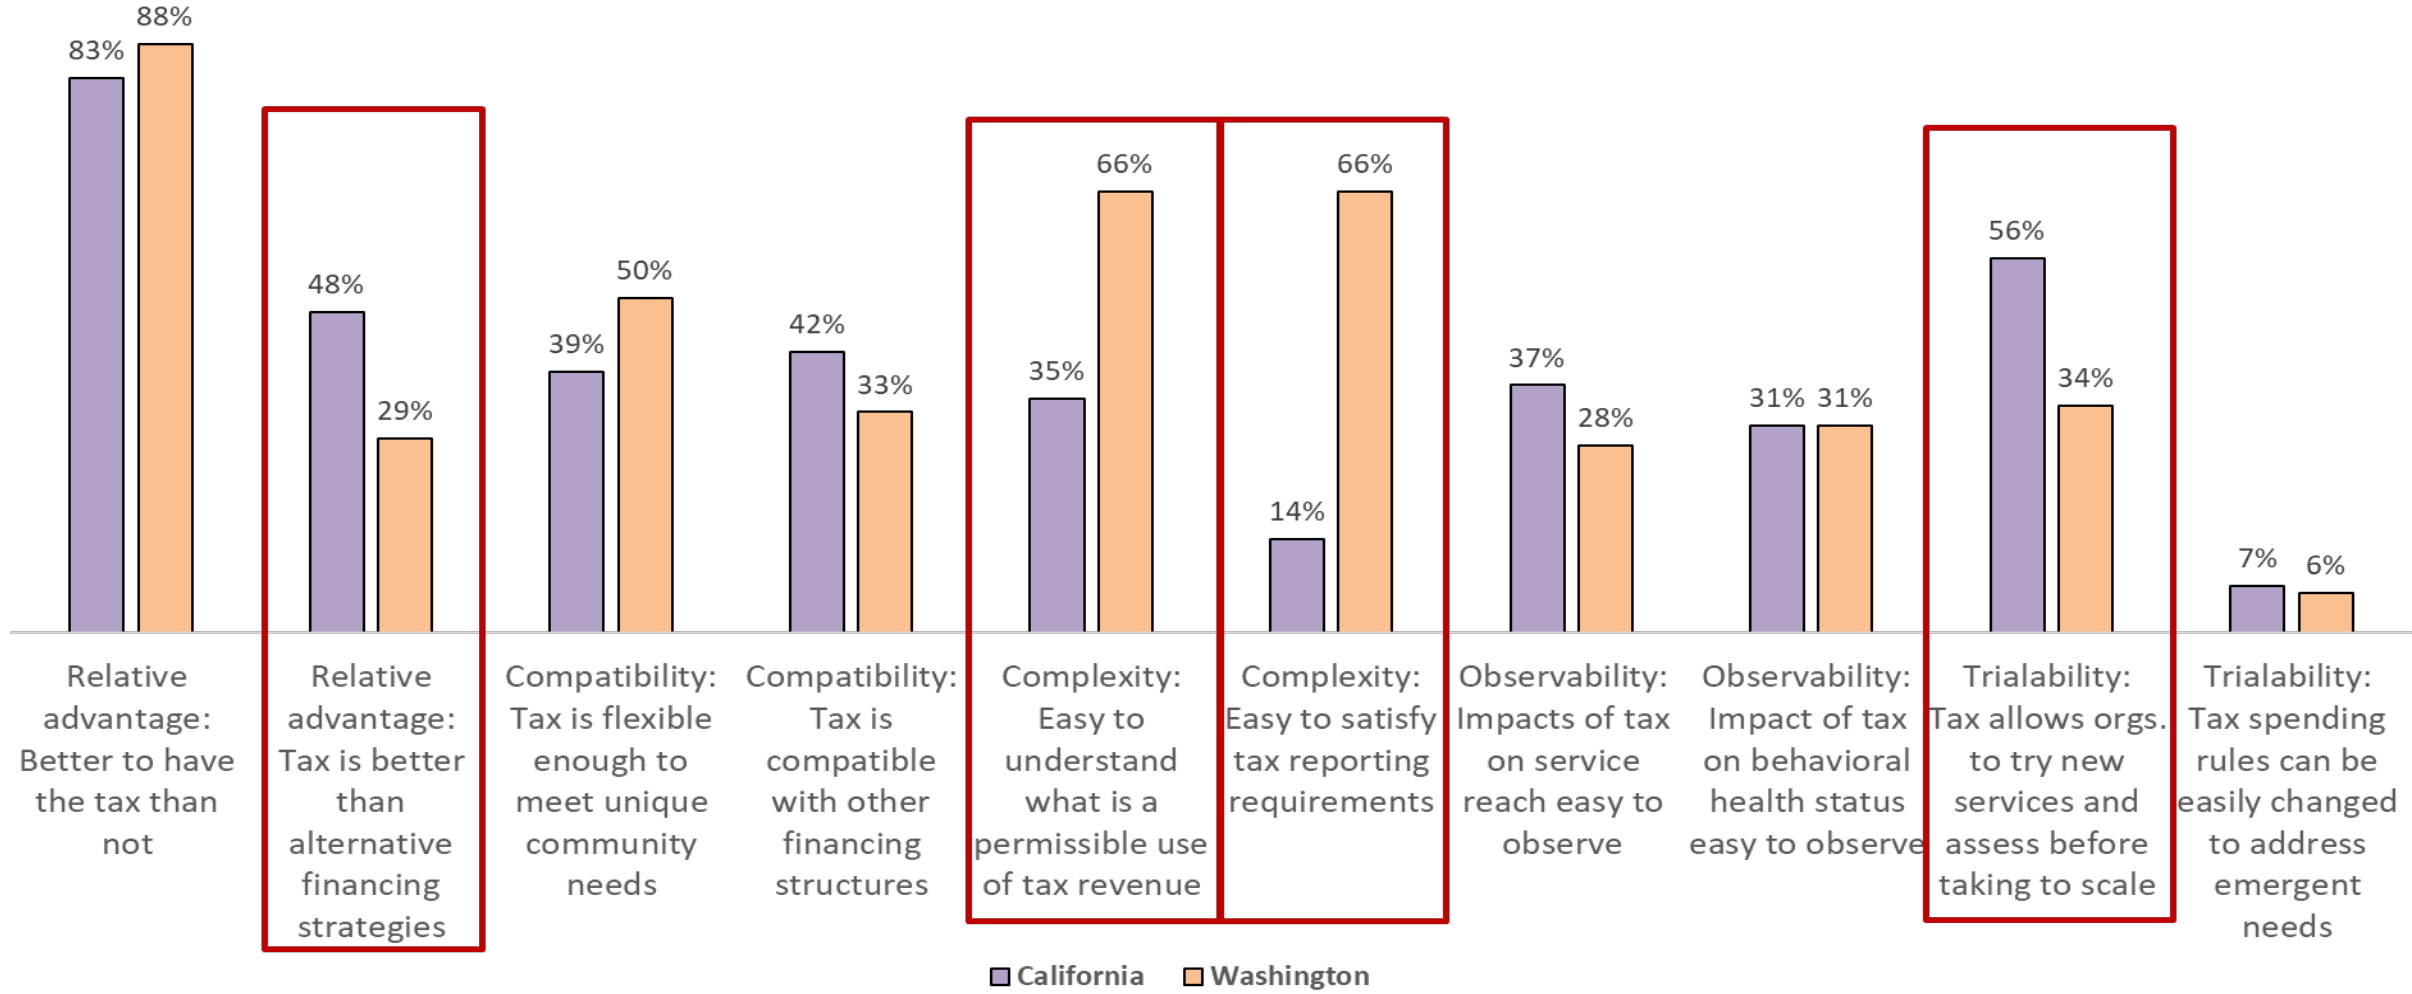

Cumulative Percentage of U.S. Population Living in a Jurisdiction with an Earmarked Tax for Mental Health Services

207 Separate Earmarked Tax Policies

Purtle, J., Wynecoop, M., Crane, M. E., & Stadnick, N. A. (2023). Earmarked Taxes for Mental Health Services in the United States: A Local and State Legal Mapping Study. *The Milbank Quarterly*.

Perceptions of the Attributes of Taxes Earmarked for Behavioral Health Services in CA and WA,
 “Strongly Agree” Ratings of 6-7 Dichotomized, N=155

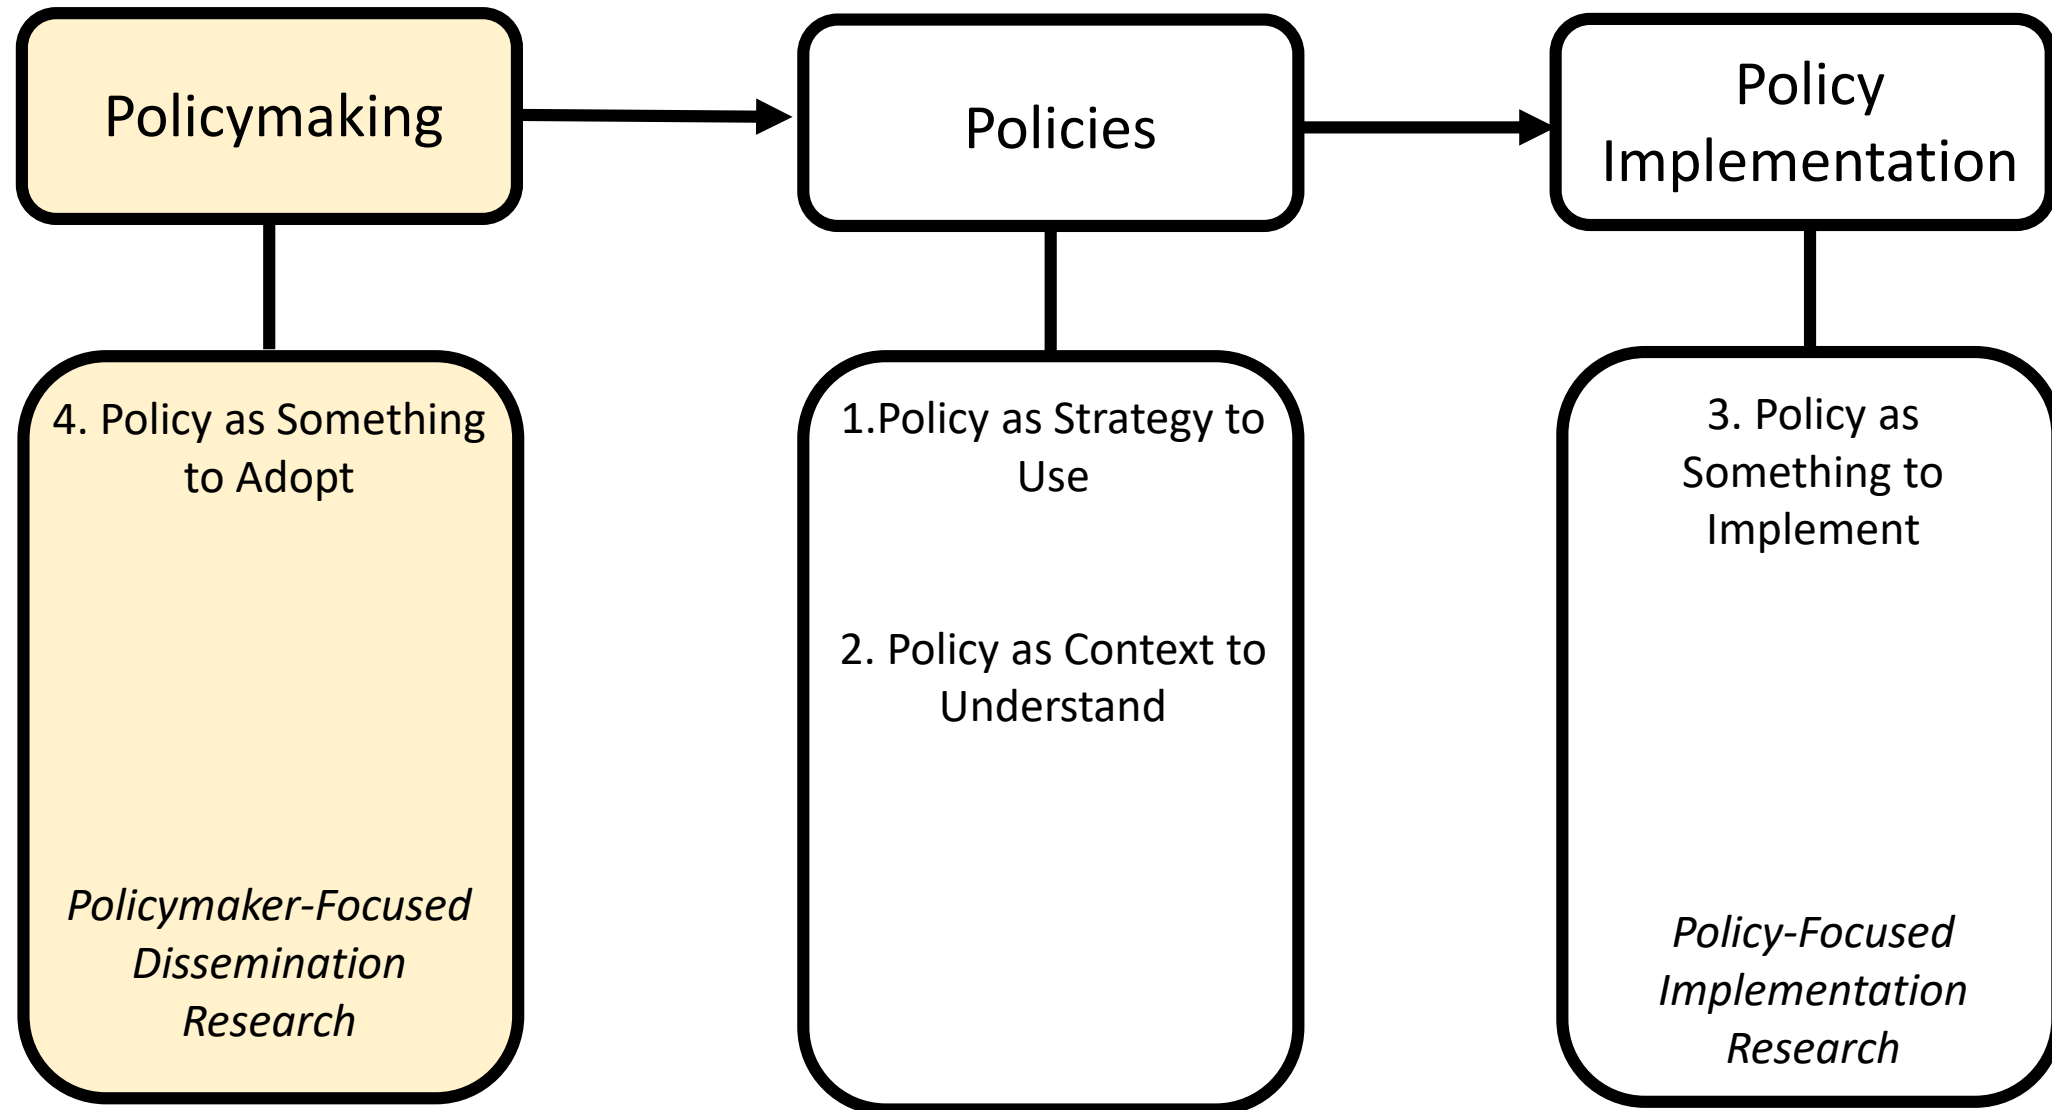

Purtle, J., Stadnick, N. A., Wynecoop, M., Walker, S. C., Bruns, E. J., & Aarons, G. A. (2023). A Tale of Two Taxes: Implementation of Earmarked Taxes for Behavioral Health Services in California and Washington State. *Psychiatric Services*.

Identity Determinants of Perceived Policy Implementation Success

	Model 1: All		Model 2: Delivery System Orgs.		Model 3: Non- Delivery System Orgs.	
	β	p	β	p	β	p
<i>Inner Context</i>						
Individual role in tax implementation	0.11	0.09	0.04	0.65	0.23	0.06
Implementation climate related to the tax being used to support EBPs	0.36	<. 001	0.45	<. 001	0.33	0.004
<i>Outer Context</i>						
Cosmopolitanism	0.08	0.29	0.04	0.75	0.03	0.77
Peer pressure	0.1	0.19	0.07	0.51	0.11	0.39
<i>Innovation Determinant</i>						
Perceptions of earmarked tax policy	0.44	<. 001	0.36	0.001	0.66	<. 001

4 Ways to Think About Policy in Implementation Science

4. Policy as Something to Adopt

- Goal:
 - Understand how **policymakers' minds can be changed**, and **policymaking processes can be modified**, to increase adoption, and thus reach, of an evidence-supported policy
 - Policymaker-focused dissemination research
 - Focused on clear and compelling communication of research evidence to policymakers
- Example research aims:
 - Characterize policymakers'
 - Knowledge about the policy and/or the issues that it addresses
 - Support for the policy (define it for them)
 - Attitudes towards the policy
 - Characterize the sociopolitical environment related to the policy and/or the issue it addresses
 - Public opinion
 - News, entertainment, and social media
 - Tailor and test different messages about the policy for policymakers with different characteristics (audience segmentation)
 - Evaluate researcher-policymaker collaboratives' effects on policy adoption

Three Stage Approach to Policymaker-Focused Dissemination Research

Purtle, J., Marzalik, J. S., Halfond, R. W., Bufka, L. F., Teachman, B. A., & Aarons, G. A. (2020). Toward the data-driven dissemination of findings from psychological science. *American Psychologist*, 75(8), 1052.

Formative Audience Research:

Characterizing Policymakers'

- Knowledge and Attitudes about Issues

- Prevalence and Correlates of Policymaker

Support for Policies

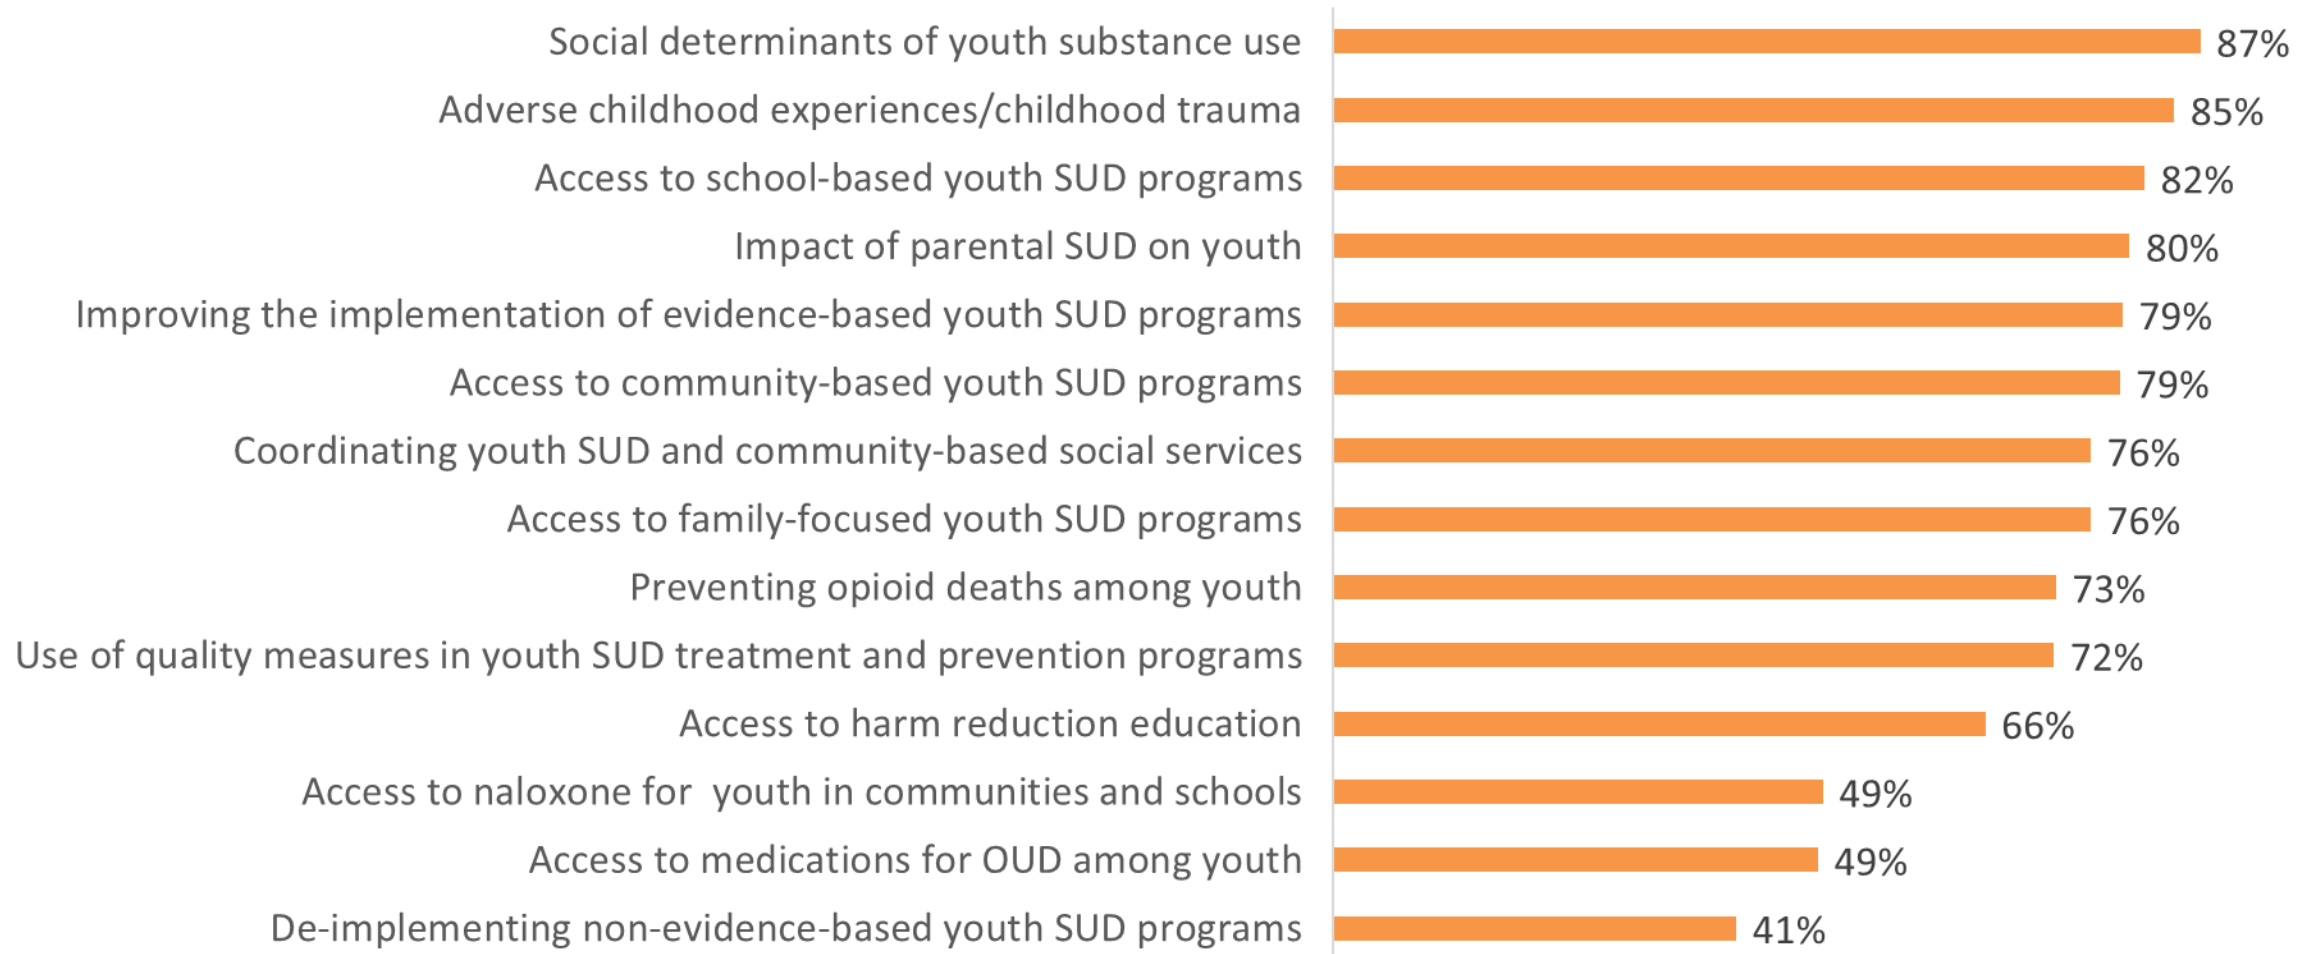

Legislator Factors Associated with Support for State Behavioral Health Parity Laws (39.0% strongly support)

Purtle, J., Lê-Scherban, F., Wang, X.,... Brownson, RC. State Legislator Support for Behavioral Health Parity Laws: The Influence of Mutable and Fixed Factors at Multiple Levels. *The Milbank Quarterly*. 2019.

Formative Audience Research: Identifying Policymakers' Priorities

**Proportion of Youth Substance Use Issues Rated as “High Priority” (4 or 5 on 5-point Scale)
State and County Substance Use Agency Officials, 2020, N= 122**

Purtle, J., Nelson, K. L., Henson, R. M., Horwitz, S. M., McKay, M. M., & Hoagwood, K. E. (2021). Policy Makers’ Priorities for Addressing Youth Substance Use and Factors That Influence Priorities. *Psychiatric Services*.

Stokes, D. C., Purtle, J., Meisel, Z. F., & Agarwal, A. K. (2021). State Legislators' Divergent Social Media Response to the Opioid Epidemic from 2014 to 2019: Longitudinal Topic Modeling Analysis. *Journal of General Internal Medicine*, 1-10.

Three Stage Approach to Policymaker-Focused Dissemination Research

Purtle, J., Marzalik, J. S., Halfond, R. W., Bufka, L. F., Teachman, B. A., & Aarons, G. A. (2020). Toward the data-driven dissemination of findings from psychological science. *American Psychologist*, 75(8), 1052.

research

Cutting through the noise during crisis by enhancing the relevance of research to policymakers

Taylor Scott, jxs1622@psu.edu
Jessica Pugel, jrp6229@psu.edu
Pennsylvania State University, USA

Daniel M. Butler¹ and David W. Nickerson²

General Procedure:

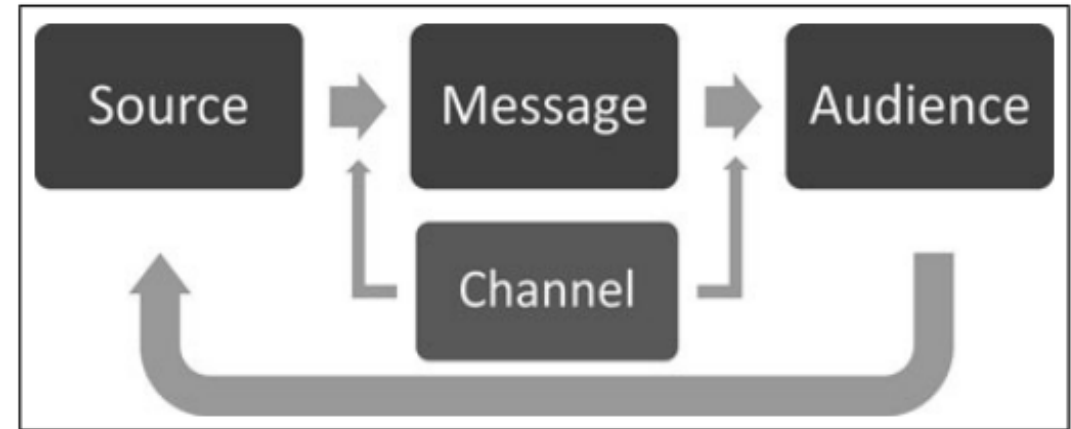

1. Randomize
policymakers
(usually cluster)

2. Disseminate
evidence

3. Collect data
and compare
across study arms

Considerations: What to experimentally manipulate?

- Source/messenger
 - E.g., academic researcher vs. advocacy organization
- Message/frame
 - E.g., emphasize narrative vs. quantitative data
- Channel/mode
 - E.g., e-mailed policy brief vs. data dashboard
- Assess effect heterogeneity between audience sub-groups

Brownson et al. (2018) Model for Dissemination Research

Considerations: Outcomes

Outcome Type	Outcome	Pros	Cons/Considerations
Engagement with disseminated evidence	E-mail views	<ul style="list-style-type: none">• Directly observable, no need for surveys	<ul style="list-style-type: none">• Necessarily outcomes, but not meaningful in and of themselves• Some e-mail servers block e-mail view and link click tracking
	Link clicks/website visits		
	Requests for consultation		

Example: Policymaker Dissemination Field Experiment
